NB:
- The information provided in the table is a general recommendation from which no rights may be derived.
- NLQF = Netherlands Qualifications Framework. EQF = European Qualifications Framework.
- The information regarding international study programmes at VMBO and MBO level is issued by SBB, the foundation for Co-operation on Vocational Education, Training and the Labour Market.
Introduction

Albania (Shqipëria or Shqipnija in Albanian) is officially known as the Republic of Albania. It is a country located in the west of the Balkan peninsula, and neighbouring the Adriatic and Ionic seas, Greece, Macedonia, Kosovo and Montenegro. Albania officially applied for EU membership on 28 April 2009.

Albania is a member of the United Nations, NATO, the Organization for Security and Co-operation in Europe (OSCE), the Council of Europe and the World Trade Organisation. Albania is a parliamentary democracy. Albania’s capital, Tirana, is home to around 900,000 of the country’s 3.6 million inhabitants.

The constitution states that the government and parliament determine educational objectives and structure. Day-to-day supervision and management are handled by the Ministry of Education and provincial/municipal authorities. The Law on Higher Education dates from 2007, and includes amendments from subsequent years. The general aim is to structure the Albanian education system according to the Western European model. Higher education is provided by 13 public universities and 38 private institutions and faculties. The higher education system is primarily unitary.

The language of education is Albanian. The academic year runs from October to June. Education is compulsory for children aged between six and fifteen.

Primary and secondary education

Primary education
Primary education (basic education) commences at the age of six, and lasts for 8 years. It is compulsory, and culminates in a final examination. After these initial 8 years, pupils receive a certificate for the completion of primary education (Dëftesë Lirimi). The duration of primary education was extended to 9 years in 2008 / 2009, including a 1 year extension of compulsory education, which now also lasts 9 years.

General secondary education
The 9 years of basic education are usually followed by programmes lasting 3 to 4 years. General education is provided at secondary schools (shkollë e mesme). Pupils are prepared for the matura examination (matura-examen), allowing them to obtain their matura diploma (Dëftesë Pjekurie), which grants admission to higher education. Pupils of 3-year vocational training programmes can also sit for matura exams.
Vocational training programmes following basic education last 3 to 4 years, and train pupils for various professions at secondary-school level. A vocational qualification is usually awarded upon completion of these programmes. The initial years of these programmes consist of several general subjects, so that, in addition to the vocational qualification, a HAVO-level in general education can also obtained.

In terms of level, the diploma following a nominally 4-year vocational training programme is comparable in the Netherlands to a HAVO diploma for its general component.

**Admission to higher education**

Admission to higher education requires the Dëftesë Pjekurie, the diploma obtained upon completion of the matura examination. To be admitted to public institutions, students must have passed the mathematics and literature sections of the matura exam, as well as completed two electives from a maximum of ten. These additional electives are not required by private institutions; however, most institutions do have extra admission examinations in addition to the matura examinations.

**Higher education**

In principle, Albania follows the Bologna model in accordance with the 2007 Law on Higher Education (and supplements from 2010). Higher education institutions can be public or private, and may offer one, two or three levels of higher education (bachelor, master, PhD) depending on the institution. Research universities and academies may offer programmes up to PhD level; universities of applied sciences and professional colleges often only offer the first one or two levels.

The higher education system is primarily unitary; there is no distinction between institutions that provide professional programmes and those that offer traditional research programmes.

Higher education is provided by 13 public universities and 38 private institutions. There are also non-university institutes that offer 2-year programmes.
University and higher professional education

Although institutions do exist that offer only higher professional education, most higher education institutions provide both professional and research programmes.

Bachelor

The first phase of higher education takes a minimum of 3 years, and culminates in the Diplomë e Nivelit të Parë (First-Level Diploma – bachelor). At many institutions, this initial degree can also take 4 years to complete. The basis for the 2007 Law on Higher Education is 3 years for bachelor-level programmes (180 ECTS). Despite this, 4-year degrees are also offered (240 ECTS). Depending on the type of study, the programme may focus on the practice of a profession (i.e. final courses of study), or lead to advanced programmes at master’s level, usually with a view to specialization or research.

In terms of level, the Diplomë e Nivelit të Parë is comparable to an HBO or WO bachelor’s degree in the Netherlands, depending on the type of study.

Master

Completion of the first level grants access to Diploma e Nivelit të Dytë programmes (Second-Level Diploma – master). Two-year master’s programmes (120 ECTS) grant access to further study (doctoral studies and specializations). There are also professional master’s programmes (Master Professional) that last 1 to 1½ years (60-90 ECTS). These programmes probably involve more advanced studies in specific professions. Research in the form of a thesis is not part of the programme.

Albania also has integrated study pathways that incorporate full Second-Level Diplomas: Program i Integruar i Ciclit të Dytë (Integrated Second-Level Programme), primarily for programmes such as medicine, veterinary science, pharmacy and architecture. These programmes have a nominal length of 5 to 6 years (300-360 ECTS).

In terms of level, the Diplomë e Nivelit të Dytë/Master Professional/Integruar i Ciclit të Dytë is comparable to an HBO or WO master’s degree in the Netherlands, depending on the type of study.
PhD
The third phase involves further specializations (Doktoratura), such as those in medicine, law or economics usually lasting 2 to 4 years, and the doctoral programmes proper, which take 3 years at least and 5 years at most. Admission to specializations and doctoral programmes requires a master’s degree with a nominal length of at least 2 years. Separate admission procedures seem to exist for shorter master’s programmes, such as the professional master’s programmes. The final title bestowed after doctoral studies is Doktor i Shkencave (Doctor of Sciences), which is awarded upon submission and defence of a doctoral thesis.

Assessment systems

A grading system from 1 to 10 is commonly employed in secondary and higher education.

<table>
<thead>
<tr>
<th>Numerical grade</th>
<th>Letter grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
<td>Dhjetë</td>
<td>Excellent</td>
</tr>
<tr>
<td>9</td>

<td>Pesë</td>
<td>Lowest passing grade</td>
</tr>
<tr>
<td>4-1</td>
<td>Kater, tre, dy, një</td>
<td>Fail</td>
</tr>
</tbody>
</table>

Albania also uses the ECTS system.

Bologna Process

Albania signed the Bologna Declaration in 2003, and is currently working on implementing the agreements.

Information on the current situation can be found on the official European Higher Education Area (EHEA) website: [www.ehea.info/country-details.aspx?countryId=2](http://www.ehea.info/country-details.aspx?countryId=2).
Qualification Frameworks

Albania in principle has decided to implement a qualification framework, but has not yet reached a system in which such a framework has been defined in detail.

Quality assurance and accreditation

Albania has a Public Agency of Accreditation for Higher Education (PAAHE), which is responsible for the internal quality control and accreditation.

More information on accreditation decisions regarding programmes at the various institutions is available at the PAAHE website. See under Addresses.

International treaties

Albania signed the Lisbon Convention in 1999 and ratified it in 2002. Bilateral treaties in the fields of research and higher education also exist, with countries including Austria, Germany, Italy, Poland, Bulgaria, Greece, Romania, Slovenia and Turkey.

Diploma Supplement

It is currently not known whether the Diploma Supplement is a statutory requirement at Albanian higher education institutions.

## Composition of file

Usually two documents are issued upon completion of a higher education programme: one certificate containing the examination results and information about the study programme, as well as a certificate awarding the degree.

Minimum file requirements: each file originating from Albania must comprise a certified copy of the original Albanian diploma and a certified translation, where applicable. The same applies to any accompanying transcripts.

## List of higher education institutions

Date on January 4, Ed.
Qualification Albania

Dëftesë Pjekurie

- Matura exam diploma
- grants access to all higher education programmes in Albania

This qualification is comparable to a VWO diploma in the Netherlands.

NB: This information is a general recommendation from which no rights may be derived.
Qualification Albania

Diplomë e Nivelit të Parë

- first cycle higher education diploma (EHEA – Qualifications Framework)
- usually grants access to master’s programmes in Albania
- has a nominal duration of 3 to 4 years

This qualification is comparable to an HBO or WO bachelor’s degree in the Netherlands, depending on the type of study.

NB: This information is a general recommendation from which no rights may be derived.
Qualification Albania

Diplomë e Nivelit të Dytë

- second cycle higher education diploma (EHEA – Qualifications Framework)
- grants access to PhD programmes in Albania, provided the programme has a nominal duration of 2 years.

This qualification is comparable to an HBO or WO master's degree in the Netherlands, depending on the type of study.

NB: This information is a general recommendation from which no rights may be derived.
